I. INTRODUCTION

A. COMPANY

Based in Washington, D.C., ACDI/VOCA is a nonprofit international development organization that delivers technical and management assistance in agribusiness, financial services, enterprise development, community development and food security to promote broad-based economic growth and vibrant civil society. For more information, visit <https://www.acdivoca.org/>.

B. BACKGROUND

The Knowledge Management team at ACDI/VOCA supports 150 employees at its Home Office in Washington, D.C., and 1,100+ additional employees in 25+ countries around the world. ACDI/VOCA needs technical expertise, project management and development resources to address access control, information architecture, change and release management, and end-user experience issues on AV's SharePoint and Microsoft Teams applications.

II. PURPOSE

This Request for Proposal (RFP) solicits proposals from qualified entities to assist ACDI/VOCA's Knowledge Management team in addressing five areas where SharePoint and Microsoft Teams need attention:

1. Access control and permissions management
2. Information architecture
3. Publishing and content lifecycle
4. Training and adoption
5. Governance

ACDI/VOCA's Home Office currently has 1 SharePoint Administrator who provides advisory and support services for SharePoint and Microsoft Teams with 3 additional staff members who provide general advisory and support services for a variety of products and services in the knowledge management function.

A. SCOPE OF WORK

This RFP is to solicit proposals to provide technical expertise, project management and development resources to address access control, information architecture, change and release management, and end-user experience issues on AV's SharePoint Online (Microsoft 365) and Microsoft Teams applications. Five areas have been identified for improvement:

1. ACCESS CONTROL AND PERMISSIONS MANAGEMENT

- Access control and permissions granting has been inconsistently managed over time which has resulted in blocked access for end-users, security vulnerabilities, and an unnecessary permissions management burden on system administrators.
- Broken inheritance and granular permissions have been applied over time without documentation.

2. INFORMATION ARCHITECTURE

- End-user customizations, including folder-based structures, have resulted in inconsistent site and document library architectures as well as difficulty for end-users to find what they're looking for and difficulty scaling support services.
- Main and sub-navigations need re-architecting and redeployment.
- Hub sites need to be enabled in the site architecture and configured to take advantage of shared navigation, look and feel, content roll-up, search roll-up and Home landing page.

- A central repository of documents which contains multiple libraries with sensitive content requires a more secure architecture and redesign.
- The existing taxonomy standard (document library columns) for sites needs updating and deployment with a method for managing changes over time to this standard.

3. PUBLISHING & CONTENT LIFECYCLE

- Customized publication processes need to be realigned with default SharePoint publishing features and leading practice.
- Auditing, change-logging, data retention, data disposition and data validation need adjustment to align with leading practice.
- Existing processes have resulted in significant amounts of duplicate content via document copying workflows.
- The system currently has incomplete documentation, inconsistent with its current state, and there's a need for implementing more automation to support retention thresholds, document tagging and surfacing content in multiple locations.

4. TRAINING AND ADOPTION

- A mix of new, old, and on-premises SharePoint environments with legacy settings that have been extensively customized making it difficult to train existing and new end-users.
- Existing processes have been highly customized resulting in an increased need for small-group, customized training, which isn't scalable.
- A lack of consistent training prevents full adoption of the system by end-users resulting in many ad hoc solutions that are out of compliance with organizational policy.

5. GOVERNANCE

- A comprehensive governance plan for SharePoint and Microsoft Teams does not currently exist.
- Content 'Owners' are not empowered or accountable to proactively manage their content.
- A clear map of platforms offerings, including ownership, maintenance, and customer support responsibilities must be developed.

Applications and Systems Impacted

- SharePoint 365
- "Old" SharePoint Online
- "On-Prem" SharePoint via Azure
- Microsoft Teams
- Stream
- Power BI
- Power Apps

B. DELIVERABLES

Final deliverables to be determined as part of the engagement, however, advice, development time as well as recommended methods, policies, plans and procedures to address the five issues outlined above are in scope.

ACDI/VOCA expects each resource identified by the vendor to participate, as needed, in scheduled check-ins as part of the KM team operations to discuss, decide and assign tasks needed during the month. In addition, tasks may be assigned originating from the ACDI/VOCA Help Desk, depending on the nature of the request and the ability of the resources identified by the vendor to address the requests.

ACDI/VOCA expects quarterly check-ins with vendor team and account management to review performance and discuss any suggested changes.

III. CONTRACT MECHANISM & TERMS OF PAYMENT

ACDI/VOCA anticipates issuing a Time and Materials (T&M) Purchase Order to the selected vendor with monthly invoicing and payment based on the hours of work performed in the previous month.

A copy of the purchase order terms and conditions are attached to this RFP for informational purposes. Any additional services (outside of the scope of this RFP) will be issued through either Time and Material (T&M) or fixed price purchase orders, as applicable and negotiated by both parties.

IV. PROPOSAL PREPARATION AND SUBMISSION REQUIREMENTS

VI. SOLICITATION PROCESS

However, in no event will any non-performance or delay in performance of any of Vendor's suppliers or any labor disruption affecting Vendor specifically, and not Vendor's industry generally, constitute Force Majeure for Vendor. If Vendor is affected by Force Majeure, it will (i) promptly provide notice to ACDI/VOCA, explaining the particulars and the expected duration of the Force Majeure and (ii) use its best efforts to remedy the interruption or delay if it is reasonably capable of being remedied, and to mitigate the adverse effects of such interruption or delay on ACDI/VOCA, including sourcing substitute providers of services from the market, at Vendor's expense, in order to meet ACDI/VOCA's required completion dates.

ACDI/VOCA may make unilateral changes, with prior written notice to the Subcontractor, to this Purchase Order by written order issued by ACDI/VOCA where required in writing by the Client. If any change causes an increase or decrease in the Subcontractor's cost of, or the time required for, the performance of any part of the Work, whether or not changed by any such change authorization, ACDI/VOCA shall make an equitable adjustment and modify in writing the Subcontract as applicable. Any claim by Subcontractor for an adjustment under this paragraph must be asserted in writing, fully supported by factual information, to ACDI/VOCA's Prime Contracting Officer or designee within thirty (30) calendar days from the date of receipt by Subcontractor of the written change authorization from ACDI/VOCA or within such extension of that 30-day period as ACDI/VOCA, in its sole discretion, may grant in writing at Subcontractor's request prior to expiration of said period. 18. Severability. If any provision of this Purchase Order is held to be invalid or unenforceable for any reason, the remaining provisions may continue in full force at the discretion of ACDI/VOCA without being impaired or invalidated in any way.
